

City of Crete, County of Saline

Name: Steve Hensel

Title: Police Chief

Agency: Crete PD

Email: shensel@crete-ne.gov

Coverage Objectives

A notional baseline of In-Building, Handheld, Vehicular, and Satellite/Deployable levels of coverage are illustrated below based on population and major roadways. Also shown are public safety agencies, facilities, and critical infrastructure. Please identify potential coverage differences based on public safety operational needs by marking up the map and/or explaining the change in the comments/description section.

Coverage Level	Coverage As Shown	Your Comments
In-Building	Urban Areas and Clusters (1,000+ people per square mile)	In-Building coverage within the Crete corporate City Limits meets the expectations of the Crete Police Department.
Handheld/ Partial In-Building	Census Designated Places	Proposed partial in-building coverage appears to extend into new residential areas to the east and into Tuxedo Park to the northwest.
Vehicular Modem/ Partial Handheld	Interstates, major highways, rural areas with 5+ people per square mile	(1) Much of the Crete Fire/Rescue Area of Responsibility projects east deep into Lancaster County. FirstNet access through a vehicular modem should not present a problem.
Satellite/ Deployable	All areas with less than 5 people per square mile	(2) Overall land use is, at times, more important than residential population density. Saline County's largest employer and other large industries are located just southwest of Crete. These businesses employ thousands of people each day. Given a previous Active-Shooter incident occurred in this area (September, 2010) and more industrial

growth is expected along the Hwy 103 corridor, a higher level of coverage is highly advisable.

☐ Proposed baseline meets the city coverage needs

☒ Proposed baseline meets city needs with noted changes
